

2013 Planning Workshop South Pole 1500 m Ice Core

| Friday Morning: Project Overview | |
|---|---|
| 8:30 AM | Introduction to the meeting and the project (Saltzman) |
| 8:50 AM | Site selection activities and overview (Neumann) |
| 9:05 AM | Estimated depth/age scale (Fudge) |
| 9:20 AM | Overview of the paleoclimate and meteorological context (Steig) |
| 9:35 AM | Discussion and Break |
| 10:00 AM | Overview of the trace-gas goals and sample requirements (Aydin) |
| 10:15 AM | Discussion of firn air sampling (Sowers) |
| 10:30 AM | Logistics and update on drill development, and discussion (Twickler & Johnson) |
| 11:00 AM | Discussion |
| Friday Late Morning: Proposed Work Session | |
| 11:30 AM | Four-minute (max.) presentations from anyone in attendance* to show 1-2 slides about their proposed work. * includes anyone attending via the web, as long as presentations are emailed to us via contact@spicecore.org by Thursday, 21-Feb. No exceptions. |
| 12:30 PM | Working Lunch (<i>lunch provided</i>) |
| Friday Afternoon: Nitty-Gritty Discussion | |
| | Open session to discuss any necessary topics. |
| 1:30 PM | <p><u>1. Ice core cut plan (Steig):</u> What are the real sample size needs and how does this match with the availability of ice? Is there opportunity for combining sampling on one or more of the existing or under-development CFA set-ups? How do we handle the discrete samples such as the “fugitive gases” that may need to be cut in the field?</p> <p><u>2. Measurements (Twickler):</u> Have we got someone planning to measure everything we need? Is there interest in new “exotic” measurements?</p> <p><u>3. Timescale (Fudge):</u> How are we going to develop the timescale? Do we want to start talking about a timescale “group” now?</p> <p><u>4. Other issues (Saltzman)?</u></p> |
| 5:00 PM | End of workshop |
